1. INTRODUCTION

JSB Tik is an open source and decentralized social networking platform that allow users to share their thought, feeling and everything about their life with the followers and connect with people all over the world.

JSB Tik is a social network based on the advantages of blockchain technology (distributed per to per technology) that provides users with the security, transparency and freedom.

JSB Tik social network puts the security of users first. It is completely set up with open source code and encrypts all private messages sent between users.

In short: JSB Tik is a social network that takes the strong points of blockchain technology (user data is stored in a distributed, peer-to-peer basis, and no individual organizations can intervene)

2. VISION & MISSION

- Vision

+ JSB Tik is developed with the aim at changing how the world see and use the social network.

+ JSB Tik brings core values: privacy, security and freedom that based on the decentralize platform

+ JSB Tik provides affiliate marketing social network to create financial freedom opportunity for everyone

- Mission: JSB Tik develops a unique social network platform that are different from the others with the core values: user privacy, user reward, quality of content and decentralized social network.
